

Your water well causes problems? We provide solutions!

Inspection – Regeneration – Rehabilitation – Maintenance - Cleaning

- video survey (TV-inspection) with a downhole video camera
- water well regeneration by means of impulse generators resp. other methods (depending on the actual well condition)
- sand-clearing (airlift / mammoth pump)
- “fishing” (of fallen objects)
- pumping test
- water well monitoring

... everything around your water well ...

Turn-key Projects

water well exploration
hydrological / geophysical surveys
water well drilling
complete installation

Distribution pipes

air-water-purging of drinking water lines in municipal drinking water supply grids

Sewage

air-water-purging of sewage discharge pressure lines in municipal sewage grids

Water reservoirs

disinfection and cleaning of water collecting pits
water loss analyses

etc...
