

ECEXA – NEWS August 2018

Successful economic mission of the environmental cluster ECEXA to Astrakhan

ECEXA, together with UNIDO, was invited by the city of Astrakhan to a workshop to promote the development of a modern waste management on European Union's standards.

The following issues were discussed:

- Analysis of the initial situation
- Capacity assessment of all those involved in regional waste management
- Reanalysis of waste streams and volumes as well as waste disposal fees
- Elaboration of the specifications of a waste management information system and the technical specifications for software and hardware
- Preparation of a master and business plan.

In order to develop the optimal solution for Astrakhan, we follow a clear strategy: Ecology, economy and social responsibility always have to be in harmony. That is why we actively promote the protection of the environment and develop sustainable solutions.

The ECEXA and UNIDO delegation was warmly welcomed by Oleg Polumordvinov, Mayor of Astrakhan and his team, and the next steps of cooperation have been set.
