## Signing of a "MoU" for the urbanization of approximately 6000 hectares of land in Egypt

Agricultural settlements in Egypt should create room for the population. Above all, the area around the Nile delta and the Nile valley is to be relieved.

ECEXA offers state-of-the-art and trend-setting Austrian technology to implement the desired project in an area of approximately 6000 hectares. An Egyptian delegation commissioned ECEXA to plan and implement this project.

The Egyptian and Austrian participants in the negotiations and the signing of the MoU.
