

ENVIRONMENTAL CONCEPTS EXCHANGE ASSOCIATION

ECEXA FAIR NEWS - "50 years UNIDO" November 2016

For many Austrian exporters, Africa, with its meanwhile 54 countries, is a continent with many white areas on the company map.

It is important to build new connections and not lose further market share in an important future market. ECEXA cluster partners benefit from excellent contacts in Africa, in politics and business and takes over a bridge function between Austria and Africa for know-how transfer in the field of "Green City" technology (earth-water-air).

As an active project developer, our focus lies on fostering an interactive exchange of ideas with our African ECEXA partners.
